

HyVibe System

Quick Start Guide

Download the User Manual at hyvibeguitar.com/downloads

Welcome HyViber

You are about to embark on a musical journey like that will inspire your musical creativity.

This Quick Start Guide will give you the basics of how to get started.

To access the full user guide for the HyVibe System and the HyVibe Mobile app, visit: www.hyvibeguitar.com/downloads

For instructions on how to install the HyVibe System on a guitar, visit www.hyvibeguitar.com/installation-documents

Download the HyVibe Mobile App here:

Before Getting Started

Follow these 5 steps:

STEP 1

Charge battery until the LED indicator stops flashing.

STEP 2

Download the HyVibe app and create an account.

STEP 3

Tap the Power Button to turn the HyVibe System on.

STEP 4

Open the HyVibe app and pair it to your guitar. It will automatically scan for software updates.

STEP 5

Start Vibing!

The HyVibe Interface :

HyVibe Core Features

Play with built-in effects.

Start playing right away with our preset effect banks or connect to the HyVibe Mobile app and create your own. Use the Expressivity Fader to control the effect parameters. Get inspired!

Turn your guitar into a Bluetooth Speaker.

Use your phone or computer's standard Bluetooth settings to connect the HyVibe System. When the Bluetooth Icon  appears on your guitar, you are paired and ready to jam with your favorite music and backing tracks.

Let's start looping.

1. Set the time signature, BPM, and click volume in the Metronome Menu.
2. Choose the effect you would like to record with in the Effects Menu.
3. Enter the Looper Menu and press the Enter button to access the second screen in the Looper Menu. You will see this screen:

4. Choose the 'lead' effect (the effect that you play after the loop is recorded) and the number of bars you want to record.
5. Your loop settings are now configured and you can record your loop. When the loop is playing back, you can change the lead effect.

When your guitar is connected to the app, the EQ can be used to adjust the sound of the loop playback and the Bluetooth speaker output. When the app is disconnected, the settings will remain on the guitar.

You are now ready to Vibe
